

About the Hampton Roads HMIS

Data is provided by member agencies to the Homeless Management Information System (HMIS). The Southeastern Virginia Homeless Coalition (SVHC), the Greater Virginia Peninsula Homelessness Consortium (GVPHC), the city of Virginia Beach CoC, the city of Portsmouth Homeless Action Consortium (PHAC), and the Central Virginia CoC have merged their HMIS databases, creating the *Hampton Roads HMIS*. HMIS is the repository for client level data. HMIS data can be reported for individual agencies; across an entire CoC; or for specific project types, such as Emergency Shelter, Transitional Housing, Rapid Rehousing, or Permanent Supportive Housing programs within a CoC. Different geographic areas may also be available, depending on the reporting needs. HMIS data help identify gaps in services and offer a better understanding of the needs of the service population.

Participation is required for federally and state funded homeless service providers; other providers voluntarily participate. There are a few non-HMIS participating providers in the region; their data is included in system level reports when available.

The following agencies participate in HMIS:

SVHC:

- Abba List (CAST)
- Beacon of Hope in Western Tidewater
- Catholic Charities of Eastern Virginia
- Chesapeake Department of Human Services
- Chesapeake Integrated Behavioral Healthcare
